## Test Coverage

## Conclusion & Recommendation

Based on the testing cycle, the application is NOT recommended for immediate deployment. Critical Blocking Defect (Bug-001): The P1 defect allowing checkout with an empty cart compromises core sales logic and requires an immediate fix. **Recommendation:** deployment must be blocked until Bug-001 is resolved and the checkout flow is fully re-tested. Bug-002 (P3) can be deferred to the next development sprint.
